Invited lecture

On the structure of quantum algorithms and the role of classical mathematics Richard Jozsa	1
---	---

Contributed papers

A categorical quantum logic Samson Abramsky, Ross Duncan	3
Operational semantics for formal tensorial calculus Pablo Arrighi, Gilles Dowek	21
The logic of quantum programs Alexandru Baltag, Sonja Smets	39
Quantum information-flow, concretely, abstractly Bob Coecke	57
Quantum weakest preconditions Ellie D’Hondt, Prakash Panangaden	75
Communicating quantum processes Simon J. Gay, Rajagopal Nagarajan	91
A process algebraic approach to concurrent and distributed quantum computation: operational semantics Marie Lalire, Philippe Jorrand	109
Towards a semantics for higher-order quantum computation Peter Selinger	127
Toward a software architecture for quantum computing design tools K. Svore, A. Cross, A. Aho, I. Chuang, I. Markov	145
Quantum typing Benoît Valiron	163
Non-deterministic quantum programming Paolo Zuliani	179
